Setting the stage

| Partnership Ecosystem

COOPERATION
PARTNERSHIP
WIN-WIN

- Netflix is an entertainment company
- Online services and internet networks depend upon each other
- Open Connect invests in reducing cost for ISPs
- As an internet citizen, we care about how ISP's traffic navigates through the network to reach our content
- We have an Open Peering policy and deploy OCAs on first come first serve basis

| Value of Open Connect

Power Efficient

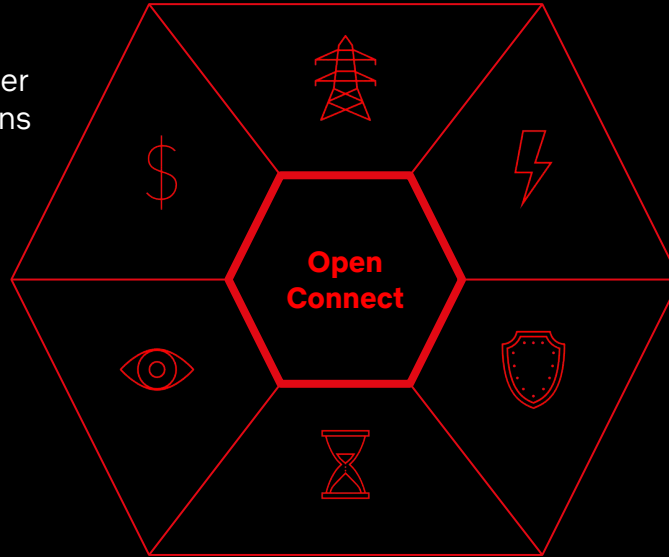

It takes just 560 w to power a
130Gbps Storage

Network Efficiencies

Bring content closer to the end user
and decrease long haul connections

Best in-class Encoding

5 Mbps to stream one movie
200% increase in number of hours
streamed with 1 Gbps over 5 years

Timing is everything

Take advantage of the off-peak hours
to load content which saves time,
congestion and doesn't cost network
a thing

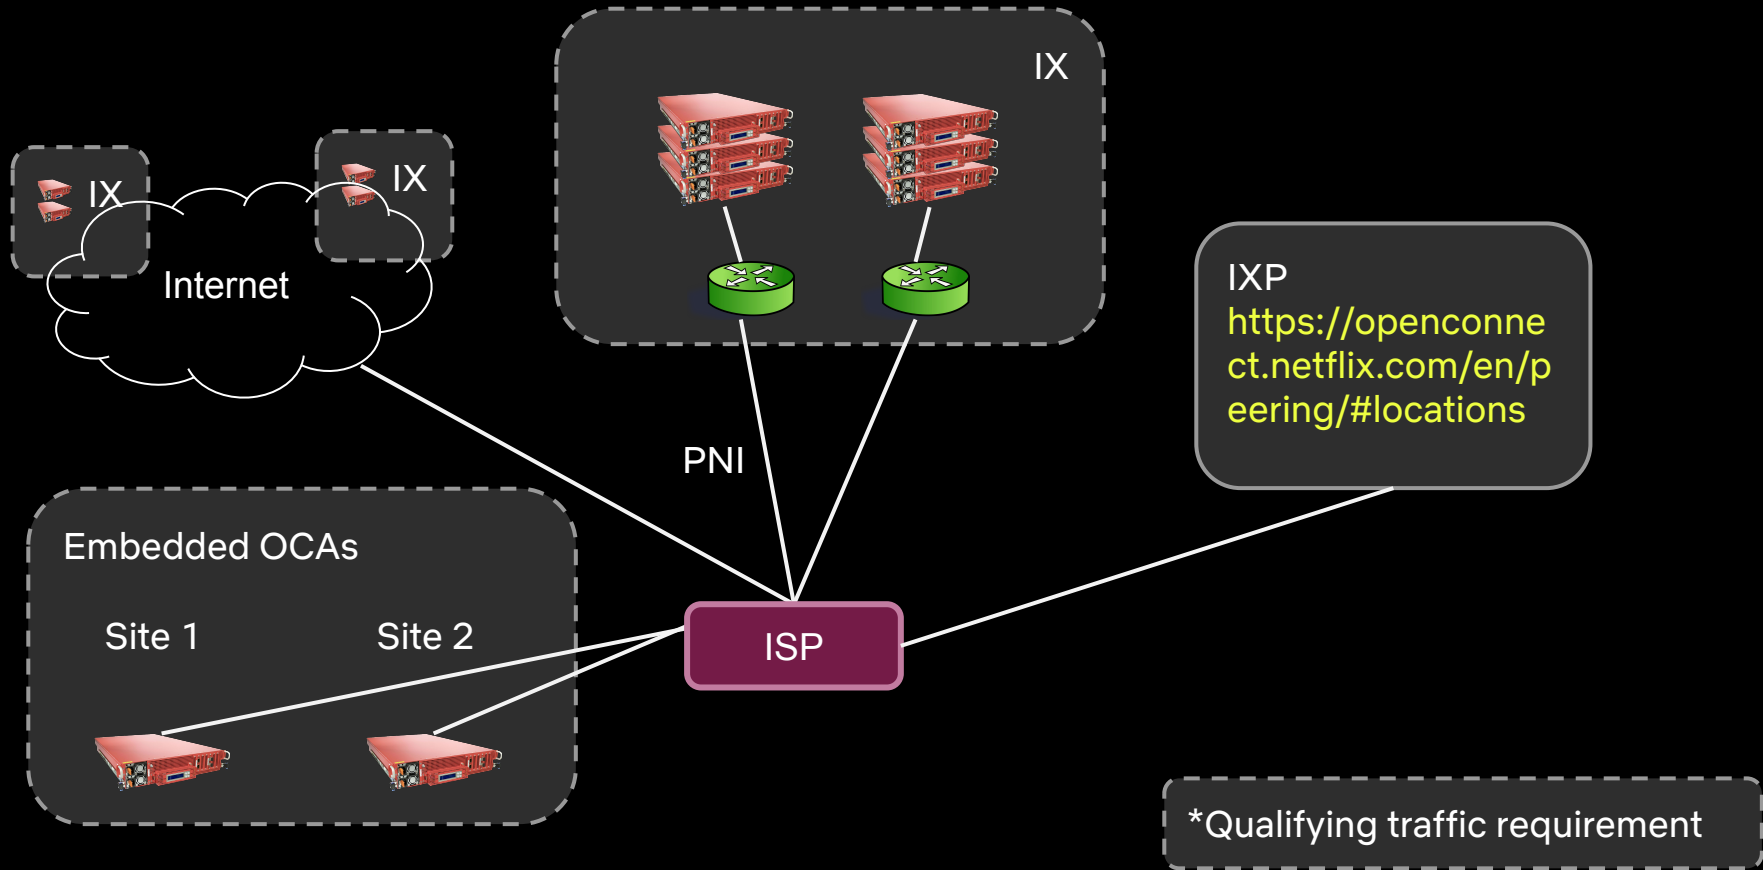

Small but mighty

A country's entire Netflix library first
into about half a rack of servers
A half rack can serve 200,000
streams simultaneously

Fault tolerance and Resiliency

Localization limits impact of incidents
and eliminates single point of failure

ISP Options

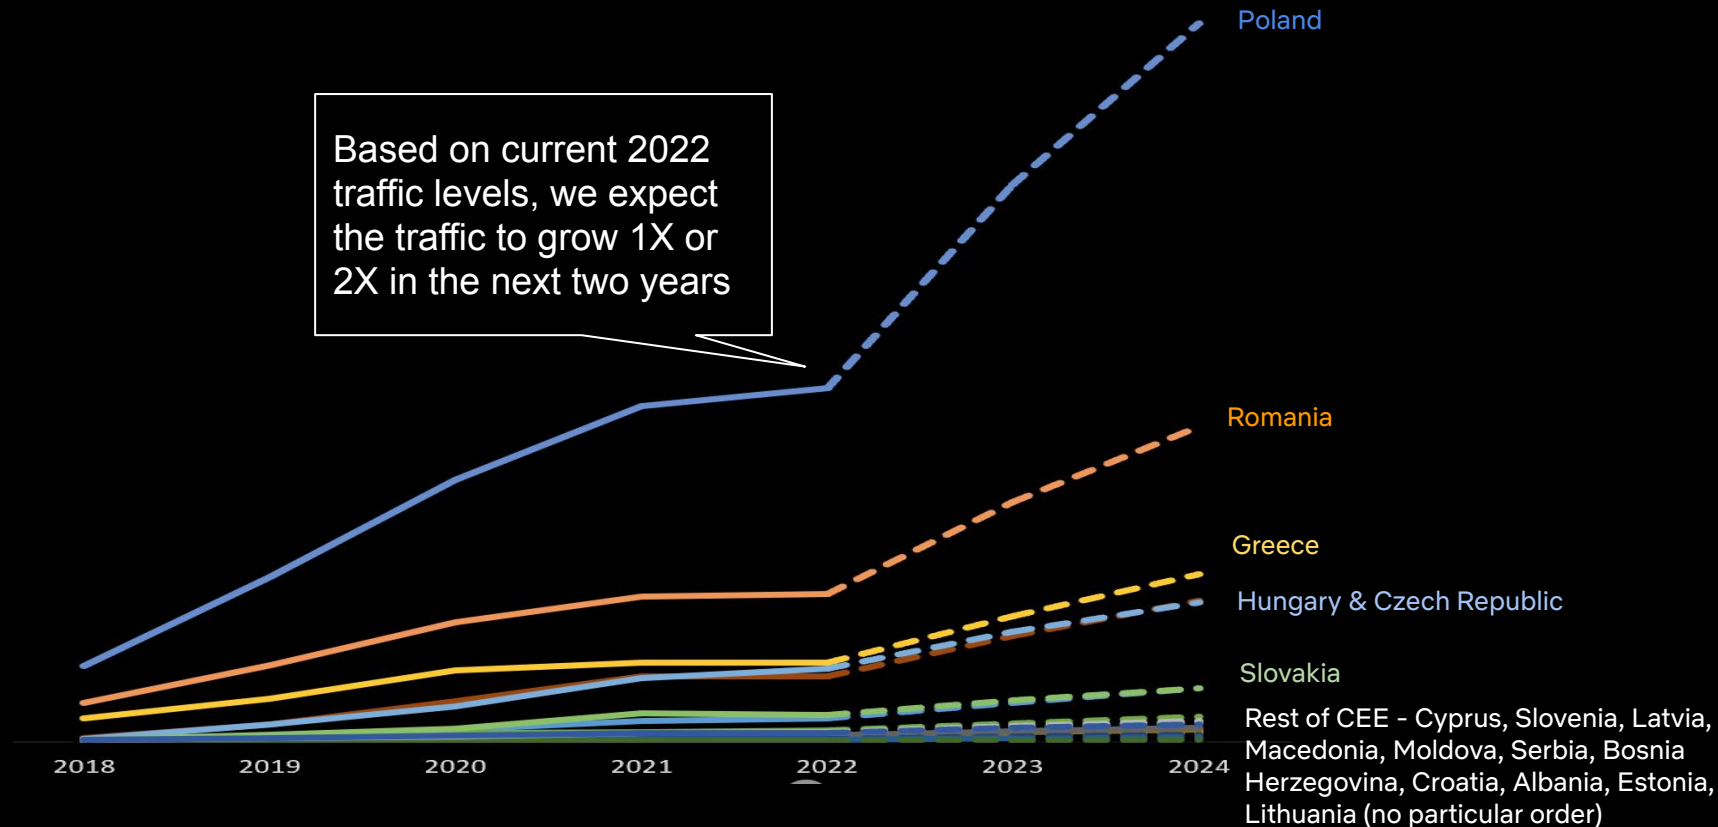

CEE Traffic Trends

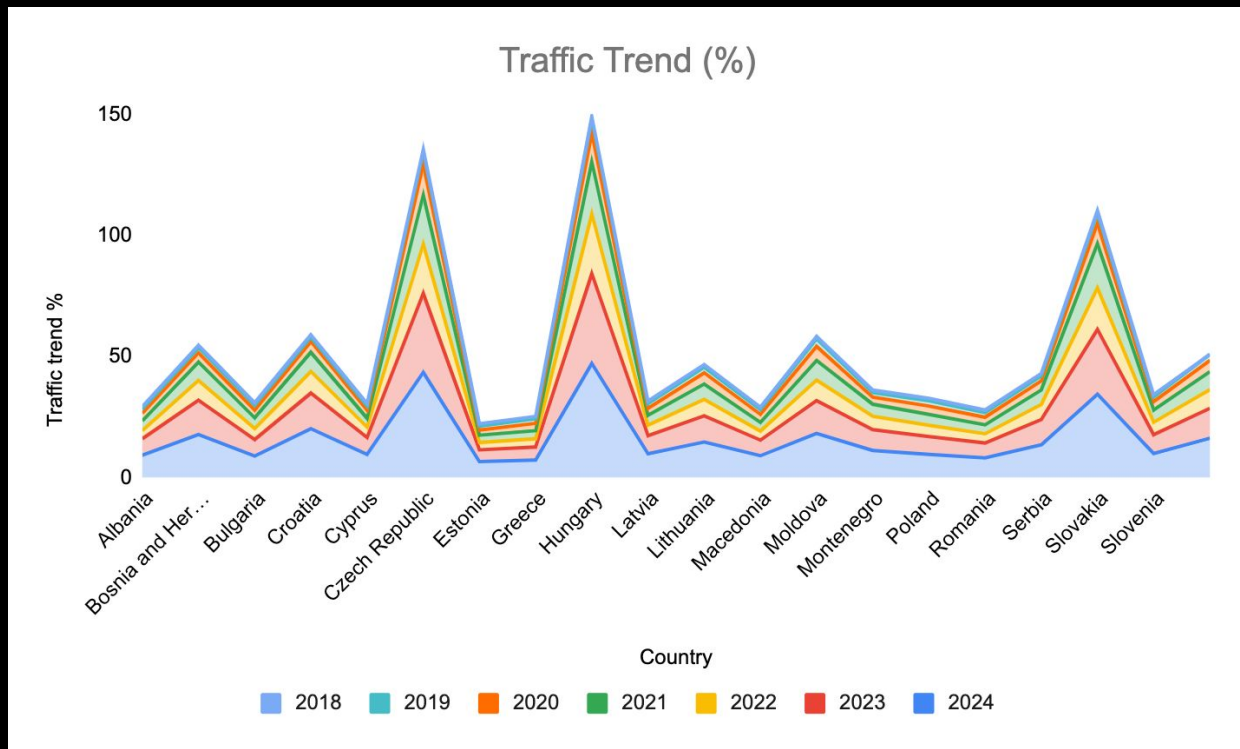

Traffic Growth in CEE Countries (absolute)

As seen by Open Connect

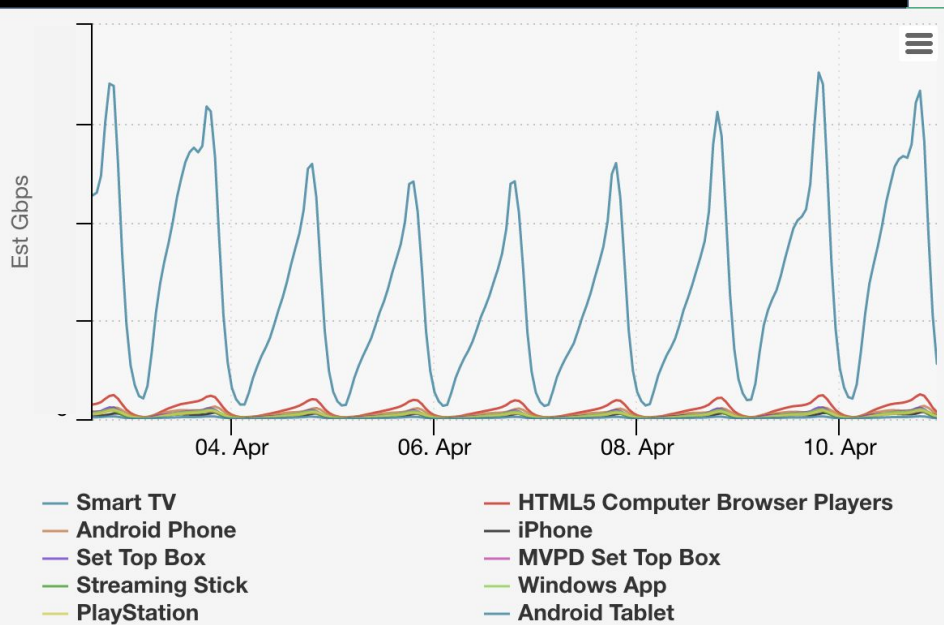

Traffic Growth in CEE Countries (relative)

As seen by Open Connect

Traffic Sources

| CEE Traffic Summary

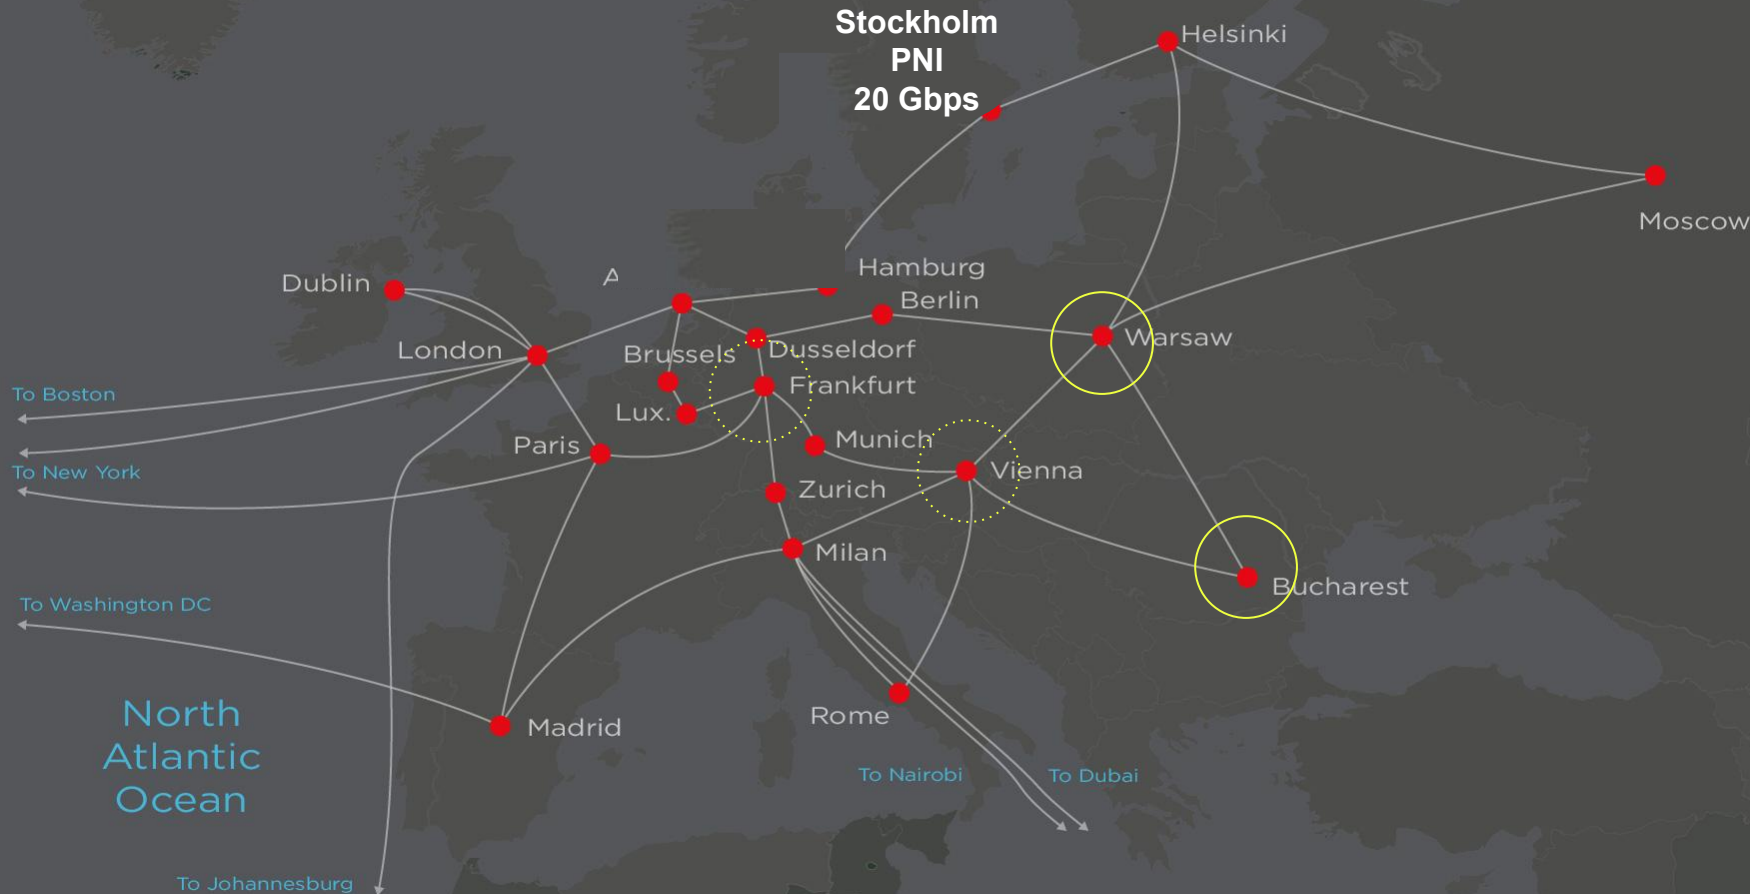

- Total Peak Traffic 8 Tbps

Embeds OCAs	PNI	IXP	Transit
69%	24%	6%	1%

- Top PNI Sources
 - Warsaw (1.1Tbps)
 - Vienna (600Gbps)
 - Bucharest (250Gbps)
 - Frankfurt (125Gbps)

Netflix IX Locations

NETFLIX

| OCAs Penetration

- 450+ OCAs
- New deployments in 2021
 - Croatia
 - Macedonia
 - Bosnia & Herz.
 - Kosovo
 - Montenegro

| Main Challenges

- IPV6 adoption
 - Smart TVs older than 3 year
 - Partner Networks IPV6 readiness
- Expanding Speed Index to more CEE countries
 - ispspeedindex.netflix.net
- Scaling in the CEE

Thank You.
